Diana Volpert, MD, FAAP, maintains a general pediatric gastroenterology practice, but specializes in the treatment of obesity and fatty liver disease. She is one of the lead pediatric gastroenterologists at Morgan Stanley Children's Hospital's Adolescent Bariatric Surgery program, which provides full nutritional assessment and support before, during, and after bariatric surgery. Along with her work in the bariatric program, Dr. Volpert has received grant support to investigate nutritional supplements for the treatment of fatty liver disease. In addition to her work in obesity and fatty liver, she also specializes in the management and treatment of inflammatory bowel disease, celiac disease, reflux, and constipation.

Dr. Volpert received her Bachelor of Science and medical degrees at Sackler School of Medicine in Tel-Aviv, Israel, in 1987. After graduation she attended Wolfson Medical Center in Holon, Israel, for her internship, followed by a pediatric residency at Kaplan Medical Center, which is affiliated with both Hebrew University in Jerusalem, Israel, and Nassau University Medical Center in New York. Dr. Volpert completed an ambulatory fellowship at Nassau University Medical Center in 2002, and a fellowship in pediatric gastroenterology, hepatology and nutrition at Columbia University Medical Center. She has been a full-time member of the faculty at Morgan Stanley Children's Hospital since 2005.

Dr. Volpert was recognized as a top pediatrician in New York and included in the 2010 edition of "The Leading Physicians of the World" by the International Association of Pediatricians.
